

I do not want any changes in New Jersey's DO NOT CALL law. I am getting too many calls from charitable organizations to make up for all the telemarketers that used to call. Being a senior citizen & handicapped & having to answer the phone makes it more of an inconvenience to have to answer telemarketers or charitable organizations who refused to take NO for an answer. We should be entitled to the priviledge of know that when the phone rings it will be something important & not harassment from telephone solicitors.
